Mobile: 07740278131

A Junior Software Developer and Business Management Graduate (First Class Honours). A professional background in Project Management, Service Management, and Marketing. Recently graduated from Manchester Codes Software Developer Fast Track Bootcamp – specialising in Front End Development. Since, I have continued to build personal projects to carry on my learning as a developer. I am looking for an opportunity to continue my growth as a Professional Developer, and to be able to bring my wealth of experience in to a role that will allow me to make a big impact in the tech sector.

SKILLS

DEVELOPMENT- JavaScript, React, React Hooks, HTML5, CSS3, SASS, Node.js, Express.js, Docker, MySQL, TDD (Mocha, Jest & React Testing Library).

- Strong organisational skills.
- Effective communicator of project updates to a wider team and project managers.
- Works well within a team or own initiative.
- Excellent team leader skills and prioritising work flow.
- Close attention to detail, minimising mistakes.
- Growth mindset- always willing to learn and improve from feedback.

CURRENT PROJECTS

Marvellous Cranes

An app designed to let people share the beauty of the metal giants in the sky that help build our cities. In a group of three, we built the front-end using React and the backend using Express and MongoDB. It was my responsibility to create the entire functionality of the frontend and link it to the backend. The app was inspired by Roy Malloys' Instagram, @marvelouscrane.

Frontend code- <https://github.com/jbram-js/marvelous-cranes>

The Gang Finds an Episode

I created this to help me decide which episode of my favourite TV show I should watch as I have watched each episode over 10 times. I created the full backend using MongoDB and Express and the frontend using React.

HOBBIES AND INTERESTS

- Watching and playing football.
- Finding new music and podcasts.
- Coding mini-projects.
- Astronomy.
- Video gaming.

EXPERIENCE

Manchester Codes Academy

March 2020 - September 2020

I learnt to code with Manchester Codes where I was taught best practices by real Software Engineers using the latest industry standard skills. You can see some of the projects I've worked on, on my portfolio.

Some of the skills I learnt during the course are below:

- Using JavaScript for frontend and backend applications.
- Creating dynamic single-page-applications using React.
- Creating APIs with Express.
- Writing robust code using Test-Driven Development.
- Pair Programming & Agile Methodologies.
- Version Control – Git, online and through the command line.
- Deployment using Heroku, Vercel and GitHub pages.
- DRY Principles.

4Imprint, Account Executive

July 2018 - Present

My role is to deal with a large number of clients ordering printed products. Some of my key responsibilities are:

- Control the order process from start to finish and being accountable for all outcomes.
- Continually assess the client and their needs, altering the plan within tight deadlines to meet client expectations.
- Communicate with external suppliers to ensure lead-times and overall order and product quality will be up to a high standard for the customer.
- Organising and managing multiple clients, prioritising express orders that have an urgent deadline.
- Manage the workflow through multiple departments to ensure an order meets its deadline.
- Look for creative solutions to solve any issues that may arise during the order process.
- Achieved over £1.6million in sales in my first full year being only one of two people in sales to beat their target.

Manchester Metropolitan University, Consultant

September 2017- May 2018

- Group consultant project which involved solving a live business problem for a real-life client.
- Supplied a 24000-word report and presented it in front of the client and university staff.
- Received a First for this assignment.

EDUCATION

Manchester Metropolitan University

2015 - 2018

Business Management - Finished with First Class Honours.
